DETAILED ACTION

Election/Restrictions

1. The election of species requirement is hereby withdrawn.

Information Disclosure Statement

2. The Primary Examiner reviewed and considered the IDSs filed 6 OCT 2006, 26 FEB 2007, 24 AUG 2007, 18 NOV 2008, 11 OCT 2010.

Drawings

3. The drawings filed 21 MAR 2006 are acceptable for examination purposes.

Specification

4. The abstract of the disclosure is objected to because it fails to recite process steps. Correction is required. See MPEP § 608.01(b). WO 2005/030822 A3 recites a suitable abstract.
5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1717

7. Claim 36 is rejected under 35 U.S.C. 102(b) as being anticipated by US 6,335,224 B1.

A. This is a product-by-process claim. Product-by-process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps. MPEP 2113. In the instant case, US '224 teaches a microfluidic device that may have a perfluoropolyether coating thereon [abstract; Fig. 2B; 4:55-57; 5:14; and 8:10]. The microfluidic device is not produced according to the same process as recited in claim 1 (most notably, the perfluoropolyether is not photocured), but the result is the same or similar: a microfluidic device having a pattern of perfluoropolyether thereon.

B. One a product appearing to be substantially identical is found, and a rejection made, the burden shifts to Applicant to show an unobvious difference [*ibid.*].

Allowable Subject Matter

8. Claims 1-35 and 37-171 are allowed.

9. The following is a statement of reasons for the indication of allowable subject matter: The prior art neither teaches nor suggests the claimed inventions including a microfluidic device comprising a patterned layer of photocured perfluoropolyether.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
